PRESS RELEASE

Additional appointment times for today's, February 10th, 2020, COVID-19 vaccination clinic at Iroquois Memorial Hospital have become available for eligible Iroquois County residents, including those 65 years of age or older. If you or a loved one is eligible and available to attend the clinic today please call ICPHD at 815-432-2483 to make an appointment. ICPHD will open phone lines to begin scheduling appointments starting at 9 AM. Individuals will not be able to schedule an appointment until that time. Individuals will not be able to receive a vaccine without an appointment.

Because appointments became available for the COVID-19 vaccine clinic being held today, this announcement has been released immediately to ensure that appointment slots are allocated to eligible residents as quickly as possible. We apologize for the short notice. Normally ICPHD would announce appointment availability at 11 AM on a day prior to an upcoming COVID-19 vaccine clinic. Going forward, ICPHD will continue to announce availability 11 AM.

Supply of this vaccine is limited and appointments are expected to be filled quickly. ICPHD is expecting to receive weekly or bi-weekly allocations of the COVID-19 vaccine from the State of Illinois. If you are unable to schedule an appointment for this community-based clinic, please watch for future notification of upcoming clinics as more vaccine becomes available.

As more vaccine is allocated ICPHD will communicate availability, along with when, where, and how to receive the vaccine, via traditional and social media outlets as well as on the ICPHD website: <http://www.co.iroquois.il.us/health-department/covid-19-corona-virus/>
