## Annual Report

December 1, 2017- November 30, 2018

# Public Health Administrator

Dear Residents of Iroquois County,

On behalf of the Iroquois County Board of Health and the Iroquois County Public Health Department staff, we are pleased to present the Iroquois County Public Health Department's (ICPHD) fiscal year 2018 Annual Report. This report provides an overview of the numerous programs and services offered by ICPHD to protect and promote the health of our community. We hope the 2018 Annual Report helps the residents of Iroquois County to become more aware of our services and our impact in the community. The Environmental Health, Community Health, and Senior Services divisions of the Iroquois County Public Health Department strive daily to meet the challenges of health and wellness faced by our residents.

As we reflect on the year 2018, the word commitment also comes to mind. As you review the report, you may be impressed with the number of residents receiving services through our local health department. You may also be surprised by the number and diversity of programs offered. What you cannot see in this report is the depth of commitment and compassion of the staff members making these programs possible. It is hard to imagine a team more dedicated to the improvement of lives and health of others. We are confident you will agree, we are fortunate to have the team we do. The Iroquois County Public Health Department is committed to serving you.

We would like to thank the Iroquois County Board of Health, the Iroquois County Board, our community partners and the residents of Iroquois County for their continual support of our efforts to ensure that Iroquois County citizens have a safe living environment, safe food to eat, safe water to drink, and are free from communicable and chronic diseases. Let us know how we can serve you better.

*Dee Ann Schippert, RN, BSN*  
Public Health Administrator

*Michelle Fairley, RN*  
Board of Health President

# Iroquois County

## Public Health Department

*An eight member Board of Health governs the Iroquois County Public Health Department. The Iroquois County Board Chairman appoints members for a three-year term.*

**(55 ILCS 5/5-25013)**  
*The Board of Health shall prescribe the powers and duties of all officers and employees, fix their compensation, and authorize payment of the same and all other department expenses from the County Health Fund of the county or counties concerned.*

### Mission Statement

The mission of the Iroquois County Public Health Department is to "fulfill society's interest in assuring conditions in which people can reach their maximum health potential." No matter your station in life, the health department focuses on education to help you achieve the highest level of wellness possible for the individual as well as the community.

# Public Health

## Ten Essential Public Health Services

## Core Functions of Public Health

**ASSESSMENT** - Monitor environmental and health status to identify and solve community environmental health problems, and diagnose and investigate environmental health problems and health hazards in the community

**POLICY DEVELOPMENT** - Inform, educate, and empower people about environmental health issues, mobilize community partnerships and actions to identify and solve environmental health problems, and develop policies and plans that support individual and community environmental health efforts

**ASSURANCE** - Enforce laws and regulations that protect environmental health and ensure safety, link people to needed environmental health services and assure the provision of environmental health services when otherwise unavailable, assure a competent environmental health workforce, evaluate effectiveness, accessibility, and quality of personal and population-based environmental health services, and research for new insights and innovative solutions to environmental health problems

# Environmental Health

The air we breathe, the water we drink, the food we eat, the places we work and the home we live in all have an impact on our health!

*As a certified health department, the Environmental Health staff conducts programs to help ensure safe food is served at local establishments, private on-site wastewater systems properly dispose sewage, and safe drinking (potable) water is provided by new and existing water wells.*

*Through the Illinois Association of Public Health Administrators (IAPHA) Legislative Committee, Iroquois County Public Health Department has a strong voice in legislation regarding Illinois House and Senate bills that affect the health of the community.*

## Body Art Inspections

Iroquois County Public Health Department contracts with Illinois Department of Public Health (IDPH) to conduct body art facility inspections in Iroquois County. All establishments providing body art services such as tattooing, piercing, branding or scarification are required to be registered. Upon receipt of a completed registration application, Environmental Health staff conducts an inspection to monitor compliance with the program. Renewal inspections are conducted periodically.

Compliance Inspections.....4

## Complaints

Complaints are investigated per the Iroquois County Nuisance Ordinance. The term “nuisance” is defined as the unreasonable or unlawful use by a person of their real or personal property, or the unreasonable, indecent or unlawful personal conduct which materially interferes with or jeopardizes the health, safety, prosperity, quiet enjoyment of property or welfare of others, offends common decency, or is offensive to the senses.

Nuisance .....28  
 Sewage.....20  
 Water .....6

## Food Sanitation

Under the provisions set forth in the Iroquois County Ordinance Governing Food and Sanitation and IDPH, Environmental Health staff is responsible for protecting individuals consuming foods in Iroquois County from food-borne illnesses. Activities include issuance of permits, inspections, destruction of unwholesome food, and complaint investigations.

Food Establishment Inspections .....	548
Permits Issued .....	194
Re-inspections .....	197
Temporary Permits Issued.....	78
Boil Orders .....	16
Cottage Food.....	6
Plan Submittal.....	3
Re-opening/Openings.....	18
Complaints.....	20
Farmers Market Inspections.....	2

Through the Public Health Emergency Preparedness Grant (PHEP), ICPHD distributed biohazard spill kits to Iroquois County food establishments to assist in preventing the spread of bloodborne pathogens.

## Illinois Liquor Control Commission

On July 1, 2017, ICPHD entered into an Intergovernmental Agreement (IGA) with the Department of Revenue for the Illinois Liquor Control Commission (ILCC) Local Inspection Pilot Program. The IGA provided staff training and support for the ICPHD Environmental Health personnel to conduct standard compliance inspections for each alcoholic liquor license holder in Iroquois County.

Liquor Inspections .....	75
--------------------------	----

## Illinois Tobacco Free Communities

IDPH provides funding to certified local health departments to implement strategies for prevention of youth tobacco initiation, secondhand smoke elimination, including promotion and enforcement of the Smoke-Free Illinois Act, and tobacco cessation, including promotion of and referral to the Illinois Tobacco Quitline.

**NO  
SMOKING**

The Smoke-Free Illinois Act requires that public places and places of employment must be completely smoke-free inside and within 15 feet from entrances, exits, windows that open, and ventilation intakes. "No smoking" signs are required to be posted at every entrance to a public place or place of employment.

Smoke-Free Illinois Act Compliance Inspections .....	770
--	-----

The Board of Directors for the Watseka Park District unanimously adopted a Tobacco Free Policy for their Outdoor Recreational Fields.

# Potable Water Program

Potable water is water that is safe to drink or to use in food preparation. Under the provisions set forth in the Iroquois County Ordinance Governing Water Wells and Water Supplies in Iroquois County and IDPH, Environmental Health focuses on reducing the risk for transmission of communicable disease by promoting the proper design, construction, and sealing of drinking water wells. A major consideration in constructing water wells is to prevent contamination from the ground surface or shallow ground water, sewage disposal systems and other hazardous sources, from entering the well.

Water Sample Kits Distributed.....	273
Unsatisfactory Samples .....	79
Non-Community Samples.....	29
Environmental Surveys.....	2
New Well Inspections.....	59
Non-Community Well Surveys .....	29
Permits Issued for New Wells.....	38
Permits Issued for Sealed Wells.....	36
Sealed Well Inspections .....	33

Well water test kits are available at ICPHD. March is Groundwater Awareness Month ICPHD offers free well water test kits.

# Private Sewage Disposal

Under the provisions set forth in the Iroquois County Ordinance Private Sewage, Disposal Systems of Iroquois County and IDPH, Environmental Health protects residents from malfunctioning or improperly constructed and maintained private sewage disposal systems which can pose serious health hazards.

Inspections .....	66
Permits Issued.....	62
Disposal Site Inspections.....	9
Pumper Truck Inspections.....	4

# Radon Program

Radon is a natural radioactive gas that is released in rock, soil, and water from the natural decay of uranium. Radon is colorless, odorless, and tasteless. It is not usually a question of “Is there radon?” but rather “How much radon is there?” The only way to tell if you have radon gas in your home is to test for it. The U.S. Surgeon General warns that radon is the **second leading cause of lung cancer** after cigarette smoking and the number one cause of lung cancer in non-smokers.

The Illinois Emergency Management Agency (IEMA) Radon Program and the Illinois Department of Public Health recommend if levels exceed 4.0 pCi/L, radon mitigation should be used to reduce the radon level and decrease the risk of lung cancer.

Number of Radon Kits Distributed.....	120
Tests >4pCi/L.....	13

Through the Radon Program, ICPHD offers free radon testing kits. **Pick one up today!**

## Solid Waste Inspections

The Environmental Health staff inspects all garbage waste hauler trucks.

Inspections..... 56

## Tanning Inspections

Inspections of tanning facilities located within Iroquois County are conducted annually to protect patrons from the hazards of ultraviolet radiation.

Inspections.....6

## Vector Control and Surveillance Program

Illinois Department of Public Health awards annual grants to local health departments to conduct vector surveillance and control measures. Environmental Health staff traps mosquitoes to track the West Niles virus. The trap is filled with an organic liquid, where the mosquito lays its eggs and uses the liquid as a feeding source for the larva. When the larva start to fly up the trap, they are caught in the net. The net is gathered and taken to the health department and frozen. The frozen mosquitoes are ground and dumped into a tray, counted, and tested. ICPHD will know within 10 minutes if the West Nile virus is present.

The mosquitoes are divided up as only certain species carry West Nile virus. Any Aedes mosquitoes are submitted to Champaign-Urbana Public Health District for Zika testing, as ICPHD does not have the necessary equipment to test for Zika.

A mosquito becomes infected by biting a bird that carries the West Nile Virus. It is then spread to humans by the bite of an infected mosquito. Environmental Health staff also collect dead “perching birds,” such as blue jays, crows, and robins. Perching birds are more susceptible with a higher rate of testing positive for West Nile Virus. These birds are frozen and sent to the state lab for further testing.

Mosquito Samples (0 positive).....173  
 Bird Samples (1 positive).....6

Through the Vector Control and Surveillance Program, ICPHD offers free larvacide to Iroquois County communities who have an applicator license and an EPA permit. Please encourage your local officials to contact ICPHD to participate in this program.

# Community Health

PROVIDE  
PROMOTE  
PROTECT-  
PUBLIC HEALTH

The Iroquois County Public Health Department aims to help all Iroquois County residents reach their maximum health potential. As a certified health department, the Community Health staff works to prevent disease outbreaks and chronic disease conditions through immunizations, testing, investigations and education.

## Clinical Services

*Developmental Screening* – Community Health nurses complete developmental screenings on children 2 – 60 months of age. Early diagnosis can help give a child the best opportunity to reach his/her full potential.

Screenings Completed.....113

*Hemoglobin Screening* – Screenings are offered at any age (children or adult) to detect or monitor low hemoglobin levels.

Screenings Completed.....59

*Hypertension Screening* – Blood pressure checks are offered at no cost during normal business hours. Regularly monitoring your blood pressure reduces your chance of heart disease or stroke.

Screenings Completed.....100

Education.....100

*International Travel Consultation* – A pre-travel consultation is recommended to prepare travelers for health concerns and to provide immunizations for vaccine-preventable diseases.

Consultations Completed.....13

*Lead Screening* – Lead screenings are completed on children over the age of one. Early detection of lead poisoning is important in the prevention of learning disabilities, behavioral problems, brain damage, muscle weakness, or even death.

Screenings Completed.....91

*Paternity Screening* – Paternity testing is provided for “Court Ordered” cases only.

Screenings Completed.....7

*Pregnancy Testing* – A urine sample pregnancy test is conducted. Early testing allows the mother to start prenatal care and obtain referrals to agencies which provide prenatal and/or parenting education.

Tests Completed.....16

# Communicable Disease Investigations

Health departments are required to investigate communicable (infectious) diseases. Community Health Nurses investigate and mitigate communicable diseases reported by mandated reporters, such as health care providers, hospitals, and laboratories. These diseases are mandated to be reported because they are considered to be contagious, infectious, communicable and dangerous to the public's health. For 2018, ICPHD investigated the following cases:

Animal Bites .....	38	Lyme Disease.....	2
Chlamydia.....	39	Mumps .....	1
Campylobacteriosis.....	4	Pertussis .....	4
Creutzfeldt-Jacob Disease .....	1	Q-fever .....	1
Cryptosporidiosis .....	1	Syphilis.....	2
Cyclosporiasis.....	3	Salmonella.....	7
Gonorrhea .....	10	Strep Pneumo Invasive <5.....	1
Haemophilus Influenza Invasive .....	2	Rabies .....	26
Hepatitis A.....	1	Norovirus Outbreak.....	2
Hepatitis B.....	6	Influenza with ICU admit .....	6
Hepatitis C.....	41	MRSA Infant less than 61 days.....	1
Histoplasmosis .....	6	Vibriosis-Unspecified .....	1
Leptospirosis.....	1	Zika .....	1
Legionellosis.....	3	Influenza Like Illness Outbreak .....	1

**Note: An investigation does not indicate a confirmed case.**

*For a complete listing of reportable diseases, please refer to the Illinois Department of Public Health website.*

## Community Outreach

Information and education increase public awareness and knowledge, and help to prevent the spread of infectious diseases. ICPHD utilizes several outreach methods and events to disseminate important information to keep Iroquois County residents safe.

Educational Presentations.....	19
Flu Clinics.....	15
Health Fairs.....	9
Public Speaking Events .....	0
Press Releases.....	16

## Dental Sealant Program

ICPHD contracts Miles of Smiles to administer the Dental Sealant Program in schools throughout Iroquois County for students meeting required guidelines.

Sealants Placed .....	223
Education Provided.....	175

## FIT Testing

The Iroquois County Public Health Department offers Colorectal Cancer Fecal Immunochemical Test (FIT) kits for individuals 50 to 75 years of age who have not had a colonoscopy in the last 10 years, a sigmoidoscopy in the last 5 years, or a history of colon cancer or prior resection. Colorectal cancer is the third most common cancer diagnosed in both men and women in the United States and is the second leading cancer killer in the U.S., but it is also largely preventable.

FIT Testing .....	6
-------------------	---

## Illinois Breast and Cervical Cancer Program

ICPHD is a sub-grantee of Livingston County Health Department for the Illinois Breast and Cervical Cancer Program grant. The Illinois Breast and Cervical Cancer Program offers free mammograms, breast exams, pelvic exams and Pap tests to eligible women. Even if a woman has already been diagnosed with cancer, she may receive free treatment if she qualifies. Approval of male client breast services are determined on a case by case basis.

New/Renewal Case Management Clients .....	22
Clinical Breast Exam .....	14
Mammogram .....	12
Pap Test.....	8
Diagnostic Services.....	13

## Immunization Program

Immunizations for children and adults are available by appointment. ICPHD does accept some private insurances.

*Adult Immunizations* – Regardless of age, immunizations protect against serious and deadly diseases. Protection from vaccines received as a child can wear off over time, placing adults at risk for new and different diseases. ICPHD starts providing flu shots in September. Getting the flu shot is the best way to reduce the chance of getting the seasonal flu and spreading it to others. It takes approximately two weeks after vaccination for the body to develop protection against the flu.

Adult Immunizations .....	63
Flu Shots.....	612
Pneumonia Vaccines .....	97

*Childhood Immunizations* – ICPHD offers Illinois' Vaccines for Children (VFC) and private pay vaccines for children. The VFC Program helps provide vaccines to children who are uninsured, underinsured, Medicaid eligible, or are American Indian or Alaskan Native. This helps ensure all children have a better chance of getting their recommended vaccinations on schedule. ICPHD continued to see an increase in the number of child immunizations given in fiscal year 2018.

VFC Immunizations .....	970
Private Pay Immunizations.....	227

## THE TRUTH ABOUT VACCINES...

- **SAFE**- Vaccines undergo rigorous safety testing prior to being approved by the Food and Drug Administration (FDA) and are continually monitored for safety
- **COST EFFECTIVE**- It is always cheaper to prevent a disease than to treat it
- **SAVE LIVES**- Vaccines protect not only your family from disease but your community too! Herd immunity protects babies, pregnant women, the elderly, and other people with compromised immune systems

## Jails and Institution Program

ICPHD Community Health staff provide physical assessment, consultation (as needed), and referrals (as appropriate) for incarcerated individuals in the Iroquois County jail, thus identifying at-risk prisoners and reducing the spread of infectious disease.

Inmates Assessed.....	89
Inmates Referred for Follow-up .....	31

## School Health Services

ICPHD Community Health staff currently provides school health nursing services for Milford Area Public Schools #124 and Iroquois County Community Unit School District #9 schools. School nurses are responsible for caring for students who become ill or injured during school hours, taking vital signs, recording symptoms, administering basic medical aid, and maintaining compliance with state school requirements. They also care for students with asthma, diabetes, head lice, allergies, and more. The school nurses provide health education to students regarding STDs, nutrition, bullying prevention, and much more.

Students Served.....	1,538
Illiana Migrant Head Start Students .....	6

**ICPHD offers free health education programs including;** Anatomy, Chronic Diseases, Communicable Diseases, Disease Detectives, Hand Washing, Health Department Services, Heart Health, Kindness Counts/Bullying Prevention, Puberty & Hygiene Program for Girls and Boys, Nutrition, and STIs. **Call 815-432-2483 for more information.**

## Tuberculosis Program

Although tuberculosis is an old disease, it remains a current threat throughout the world. The Tuberculosis Program reduces the incidences of this infectious disease in Iroquois County by providing screening, investigation, education, referral, and treatment of active and latent tuberculosis cases for Iroquois County residents. TB skin tests are available at the health department on Mondays, Tuesdays, and Fridays with the exception of holidays.

New Cases Investigated.....	5
Patients on Medication.....	1
Skin Tests Given: One-Step.....	83
Skin Tests Given: Two-Step.....	18
Tests Not Read.....	4
X-Ray Referrals.....	2

## Vision and Hearing Screening

ICPHD's certified vision and hearing technician screens preschool through high school students in Iroquois County through the screening process established by the Illinois Department of Public Health. The program provides screenings, appropriate referrals, follow-up, and education.

Vision Screenings.....	1,820
Vision Rescreens .....	240
Vision Referrals .....	175
Hearing Screenings.....	1,951
Hearing Rescreens.....	109
Hearing Referrals.....	29

# Senior Services

State of Illinois  
Department  
on Aging

The MISSION of the State of Illinois Department on Aging is to serve and advocate for older Illinoisans and their caregivers by administering quality and culturally appropriate programs that promote partnerships and encourage independence, dignity and quality of life.

Through the IDOA, ICPHD Senior Services coordinators direct the Adult Protective Services, Care Coordination Services, and Respite Services.

## Adult Protective Services

Adult Protective Service (APS) caseworkers investigate reports of suspected neglect or abuse of older adults age 60 and over, and adults with disabilities age 18-59. APS caseworkers advocate for individuals suspected of being injured, financially exploited, neglected or otherwise mistreated, and self-neglect. APS caseworkers also do training with financial institutions every three years on the State of Illinois Department on Aging B\*Safe (Bankers and Seniors Against Financial Exploitation) Program to help identify exploitation.

APS Reports .....	40
Vulnerable Adult Reports (VAR) – Self Neglect Intakes .....	4
Bank Trainings (Every 3 years) .....	3

**Report suspected abuse, exploitation,  
or neglect of an older person, call:**

**24-hour Hotline:**

**1-866-800-1409**

**1-888-206-1327 (TTY)**

## Care Coordination Services

Older or disabled adults in need of long term care will first meet with a care coordinator to discuss what kind of daily activities they can do on their own, as well as those that require help. The care coordinator can then proceed to identify services that could help residents to continue living in their own homes or community.

Annual/Needs Based Reassessment .....	236
New Client Assessment .....	79
Nursing Home Pre/Post Screens .....	189
Intensive Casework .....	87
Intensive Monitoring .....	6

## Respite Services

Respite is short-term services that help families take a break from the daily routine and stress of caring for a loved one through the provision of a caretaker.

# Public Health Emergency Preparedness

The Iroquois County Public Health Department is charged with providing the citizens of Iroquois County with a plan that will ensure Public Health response to any overt threat whether natural or man-made. Emergency preparedness includes identifying the crisis at hand as well as providing education and media information as appropriate to the public.

In the event of a biologic emergency, Public Health Emergency Preparedness (PHEP) personnel would be delegated the responsibility of coordinating the response. A plan for the distribution of Strategic National Stockpile (SNS) materials has been developed. The purpose is to establish policies, procedures and guidelines for the dispensing of mass medications and/or vaccinations to the residents of Iroquois County and to anyone who may be traveling through the county in the event of a bioterrorist attack, disease outbreak, or other natural or man-made disaster. In order to respond to an actual event, coordination and support of multiple agencies and community partners is necessary.

ICPHD's emergency preparedness coordinator has become involved in the Champaign Regional Healthcare Coalition (CRHCC). PHEP Coordinator Eric Ceci represents the Champaign region health departments on the executive committee. ICPHD also hosts a CRHCC trailer asset. This trailer contains tables, chairs, propane heaters, Personal Protective Equipment (PPE), and other materials conducive to setting up a point of dispensing (POD) for SNS materials.

## Bio-terrorism Preparedness and Response Emergency/ Disaster Plan

*Public Health Emergency Preparedness is not a steady state; it requires continuous improvement, including frequent testing of plans through drills and exercises and the formulation and execution of corrective action plans. All staff members of ICPHD are NIMS (National Incident Management System) trained.*

*If you believe that you have been exposed to a biological or chemical agent, or if you believe an intentional biological threat will occur or is occurring, please contact your local police or other law enforcement agency and/or your local health department.*

**ICPHD 815-432-2483**

# ICPHD 2018

## New Faces at ICPHD

**Taylor Eades**  
Executive Assistant

**Bethany Mayotte**  
Vision & Hearing Technician

**Kellee Ward**  
Senior Services Professional

## Nancy Reep and LuAnn Armantrout Retire

Nancy Reep, RN, Senior Services Professional, retired from the Iroquois County Public Health Department on April 30, 2018. LuAnn Armantrout, RN, Supervisor of Senior Services, retired on July 6, 2018. Both of these outstanding individuals served over 24 years in public health, coordinating care services to the residents of Iroquois County.

During their professional nursing service careers in public health, Nancy and Lu Ann contributed to numerous public health programs. Both have been tremendous assets to Iroquois County residents through their expertise in Senior Service Programs such as Adult Protective Services and the Community Care Program. We cannot begin to count the number of seniors within Iroquois County whose lives have been improved through the coordination of services that enable residents to continue living in their own homes. Just imagine the number of flu vaccines they gave in over 24 years of service. They have touched many lives.

LuAnn and Nancy have been valuable members of our team and ICPHD is thankful for all their hard work, dedication, and amazing care. They always served with kindness and compassion for others. It has been a blessing and honor to work with both of them. Their passion and dedication to the health and well-being of the people of Iroquois County will always be appreciated. We truly hope Nancy and LuAnn enjoy every minute of retirement!
