BOARD OF HEALTH FINANCE COMMITTEE

- Dr. Philip Zumwalt, Chairman
- Lisa Breymeyer, Vice-Chairman
- Barbara Offill, County Board Representative

PUBLIC HEALTH ADMINISTRATOR

On behalf of the Iroquois County Public Health Department (ICPHD), it is my pleasure to present this fiscal report for 2022. The contents enclosed within include an overview of the programs and services offered by ICPHD to protect and promote the health of Iroquois County residents.

COVID-19 pandemic operations continued in 2022 but changed significantly in format. While this created new challenges, it also allowed ICPHD to refocus on other priorities, including health education, a review of the foundations of public health basic services, and what public health will look in the future.

As ICPHD moves forward, we reflect on where we've been to derive lessons to educate decisions tomorrow. We are proud of the lifesaving work our staff have done during the height of the COVID-19 pandemic and can now see the impact our long days and nights have had in the community. We are not alone in our work, and we thank all of community partners for collaborating with us during these trying times.

The world continues to change, and so will ICPHD. The future looms with new challenges and opportunities, regardless of whether or not we wish. While I was not the public health administrator during 2022, I have had the pleasure of serving the public alongside my comrades here at ICPHD. I am proud of all that ICPHD had done and look forward to how we can serve our neighbors in the coming years.

Eric Ceci
Eric Ceci, BA
Public Health Administrator

ICPHD STAFF (CURRENT)

Over the past year, the staff of the Iroquois County Public Health Department has consisted of 33 individuals including 10 registered nurses and 2 licensed environmental health practitioners. This 33 person staff consists of 18 full-time, 7 part-time, and 8 PRN employees. ICPHD is proud to have a team with diverse talent and experience to operate its 6 departments and numerous programs to serve Iroquois County.

ADMINISTRATION

Dee Ann Schippert, RN, BSN	Public Health Administrator
Tyler Robinson	Executive Assistant
Taylor Eades	Executive Assistant
Trudy Lambert	Financial Officer
Samantha West	Financial Officer

COMMUNITY HEALTH

Anne Romadka RN, BSN	Director of Community Health Nursing Services
Teresa Castonguay, RN, BSN	Staff Nurse/School Nurse
Gina Greene, MS, ATC	Community Health Educator
Jill Johnson	Client Support Advocate (PRN)
Beth Keller, RN	Staff Nurse/School Nurse
Amanda Longfellow	Client Support Advocate (PRN)
Melissa McEwen, RN	Staff Nurse/School Nurse (PT)
Kennedy Oster	Client Support Advocate (PRN)
Vanessa Pizano	Community Health Advocate
Megan Schippert	Client Support Advocate (PRN)
Taylor Schippert	Client Support Advocate (PRN)
Alissa Stevens	Vision and Hearing Technician
Kadyn Stevens	Client Support Advocate (PRN)
Deb Longest, RN	Staff Nurse (PRN)
Patricia Ward	Client Support Advocate/Receptionist (PRN)

ENVIRONMENTAL HEALTH

Ryan Wheeler, MPH, LEHP	Director of Environmental Health
Kate Mueller, BS, LEHP	Associate Sanitarian
Ryan Torbet, BS	Associate Sanitarian

EMERGENCY PREPAREDNESS

Eric Ceci, BA, IPEM	Director of PH Emergency Preparedness (PT)
---------------------	--

CLINICAL HEALTH

Jane Newell, RN, BSN	Director of Clinical Nursing Services
Aubrey Irwin, RN	Staff Nurse
Elizabeth Heeren	Receptionist (PT)
Judy McCann	Receptionist/Vision and Hearing Tech (PT)
Chelsea McCray, RN	Staff Nurse (PT)

SENIOR SERVICES

Emily Shay, RN	Director of Senior Services
Bethany DeWitt, BS	Senior Services Professional
Danielle Walls, BS	Senior Services Professional (PT)
Jordyn Ward	Senior Services Aide (PT)

ICPHD STAFF

DEE ANN SCHIPPERT RETIRES

The Iroquois County Public Health Department extends best wishes to Dee Ann Schippert. Dee served as the Public Health Administrator for the Iroquois County Public Health Department for 8 years.

Dee has served 30 years in public health in total. Her unwavering commitment to the residents of Iroquois County proved to be a tremendous asset to the entire department and community.

Dee has been a valuable leader and the Iroquois County Public Health Department is grateful for her dedication to public health. We are extremely fortunate to have worked alongside Dee Ann Schippert.

Her work ethic, loyalty, dependability and friendship will be greatly missed by the staff as well as the community.

PUBLIC HEALTH

10 ESSENTIAL PUBLIC HEALTH SERVICES

"The 10 Essential Public Health Services provide a framework for public health to protect and promote the health of all people in all communities. To achieve optimal health for all, the Essential Public Health Services actively promote policies, systems, and services that enable good health and seek to remove obstacles and systemic and structural barriers, such as poverty, racism, gender discrimination, and other forms of oppression, that have resulted in health inequities. Everyone should have a fair and just opportunity to achieve good health and well-being." - CDC

CORE FUNCTIONS OF PUBLIC HEALTH

ASSESSMENT - Monitor environmental and health status to identify and solve community environmental health problems, and diagnose and investigate environmental health problems and health hazards in the community.

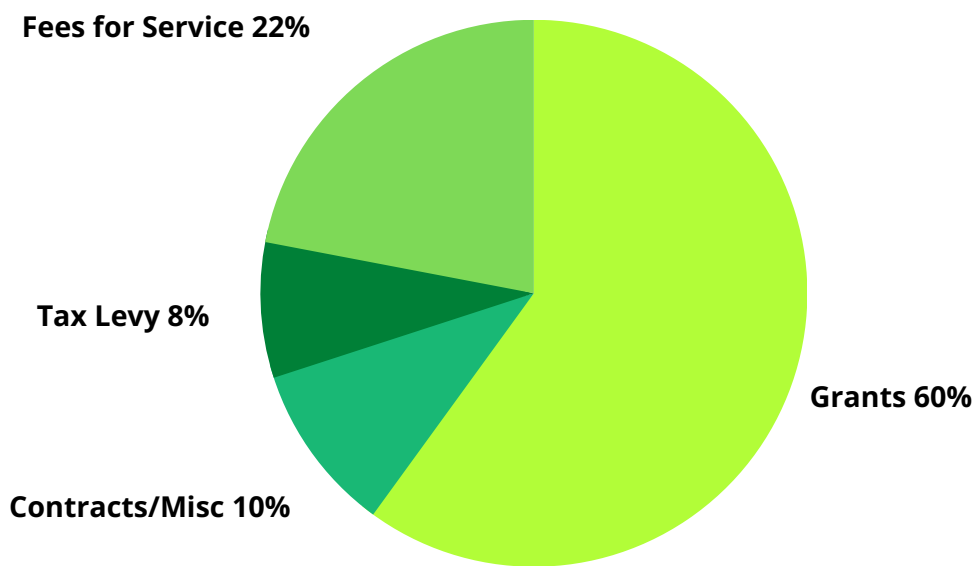

POLICY DEVELOPMENT - Inform, educate, and empower people about environmental health issues, mobilize community partnerships and actions to identify and solve environmental health problems, and develop policies and plans that support individual and community environmental health efforts.

ASSURANCE - Enforce laws and regulations that protect environmental health and ensure safety, link people to needed environmental health services and assure the provision of environmental health services when otherwise unavailable, assure a competent environmental health workforce, evaluate effectiveness, accessibility, and quality of personal and population-based environmental health services, and research for new insights and innovative solutions to environmental health problems.

COVID-19 PANDEMIC (FY 2022)

COVID-19 is a dangerous and highly contagious disease caused by a virus discovered in December 2019 in Wuhan, China. This disease quickly spread throughout the world and on March 11, 2020 the World Health Organization (WHO) declared the novel coronavirus (SARS-CoV-2) outbreak a global pandemic. Iroquois County saw its first documented case of COVID-19 in March of 2020. As the COVID-19 pandemic continued, ICPHD staff worked diligently throughout 2022 to mitigate the spread of COVID-19.

According to the CDC, COVID-19 most often causes respiratory symptoms that can feel much like a cold, flu, or pneumonia, but COVID-19 can also harm other parts of the body. Most people who contract COVID-19 have mild symptoms, but some people become severely ill. Older adults and those who have certain underlying medical conditions are at increased risk of severe illness from COVID-19.

ENVIRONMENTAL HEALTH

The Environmental Health staff conduct programs to help ensure safe food is served at local establishments, private on-site wastewater systems properly dispose sewage, and safe drinking (potable) water is provided by new and existing water wells.

BODY ART INSPECTIONS

Iroquois County Public Health Department contracts with Illinois Department of Public Health (IDPH) to conduct body art facility inspections in Iroquois County. All establishments providing body art services such as tattooing, piercing, branding or scarification are required to be registered. Upon receipt of a completed registration application, Environmental Health staff conducts an inspection to monitor compliance with IL Administrative Code 77.797. Renewal inspections are conducted annually.

Compliance Inspections.....2

COMPLAINTS

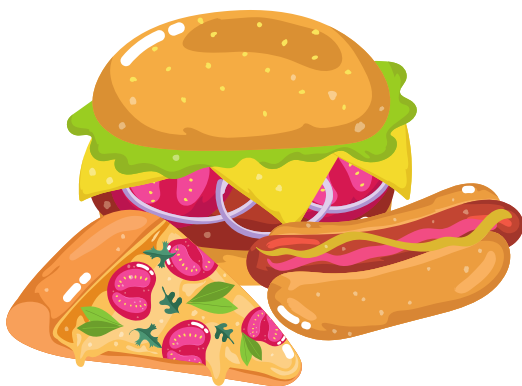

Complaints are investigated per the Iroquois County Nuisance Ordinance. The term “nuisance” is defined as the unreasonable or unlawful use by a person of their real or personal property, or the unreasonable, indecent or unlawful personal conduct which materially interferes with or jeopardizes the health, safety, prosperity, quiet enjoyment of property or welfare of others, offends common decency, or is offensive to the senses.

Nuisance.....13
Sewage.....6
Water.....1

ENVIRONMENTAL HEALTH

FOOD SANITATION

Under the provisions set forth in the Iroquois County Ordinance Governing Food and Sanitation and IDPH, Environmental Health staff are responsible for protecting individuals consuming foods in Iroquois County from food-borne illnesses. Activities include issuance of permits, inspections, destruction of unwholesome food, and complaint investigations.

POTABLE WATER PROGRAM

Potable water is water that is safe to drink or to use in food preparation. Under the provisions set forth in the Iroquois County Ordinance Governing Water Wells and Water Supplies in Iroquois County and IDPH, Environmental Health focuses on reducing the risk for transmission of communicable disease by promoting the proper design, construction, and sealing of drinking water wells. A major consideration in constructing water wells is to prevent contamination from surface or shallow ground water, sewage disposal systems and other hazardous sources, from entering the well.

RADON PROGRAM

Radon is a natural radioactive gas that is released in rock, soil, and water from the natural decay of uranium. Radon is colorless, odorless, and tasteless. The only way to tell if you have radon gas in your home is to test for it. Through this program, individuals are able to receive a free radon test kit.

The Illinois Emergency Management Agency (IEMA) Radon Program and the Illinois Department of Public Health recommend if levels exceed 4.0 pCi/L, radon mitigation should be used to reduce the radon level and decrease the risk of lung cancer. The U.S. Surgeon General warns that radon is the second leading cause of lung cancer after cigarette smoking and the number one cause of lung cancer in non smokers.

Number of Kits.....	71
>4pCi/L.....	0

SOLID WASTE INSPECTIONS

ICPHD Environmental Health staff inspect all garbage waste hauler trucks in Iroquois County.

Inspections.....	40
------------------	----

ENVIRONMENTAL HEALTH

TOBACCO FREE COMMUNITIES

IDPH provides funding to ICPHD to implement strategies for prevention of youth tobacco initiation, secondhand smoke elimination, including promotion and enforcement of the Smoke-Free Illinois Act, and tobacco cessation, including promotion of and referral to the Illinois Tobacco Quitline.

The Smoke-Free Illinois Act (Public Act 95-0017) protects the public from the harmful effects of exposure to tobacco smoke by prohibiting smoking in public places and places of employment and within 15 feet of any entrance, exit, windows that open, or ventilation intake of a public place or place of employment. Funding is provided to certified local health departments to conduct compliance inspections.

Smoke-Free Illinois Act Compliance Inspections.....364

TANNING INSPECTIONS

Iroquois County Public Health Department contracts with Illinois Department of Public Health (IDPH) to conduct tanning facility inspections in Iroquois County. Upon receipt of a completed registration application, Environmental Health staff conduct an inspection to monitor compliance with the IL Administrative Code. Renewal inspections are conducted annually.

Tanning Inspections.....2

VECTOR CONTROL AND SURVEILLANCE PROGRAM

Illinois Department of Public Health awards annual grants to local health departments to conduct vector surveillance and control measures. Environmental Health staff trap mosquitoes to track the presence of West Nile Virus. The trap is filled with an organic liquid, that contains larvicide, where the mosquito lays its eggs. The adult mosquitoes are drawn into the trap and are caught in the net. The net is gathered and taken to the health department and frozen. The frozen mosquitoes are counted and ground for testing. The test for detecting West Nile Virus takes approximately 10 minutes.

A mosquito becomes infected with West Nile Virus by biting a bird that carries the virus. It is then spread to humans by the bite of an infected mosquito. Environmental Health Staff also collect dead “perching birds,” such as blue jays, crows, and robins, for West Nile Virus testing. Perching birds are more susceptible, with a higher rate of testing positive for West Nile Virus. These birds are frozen and sent to the state lab for further testing.

Mosquito Samples (1 positive).....215
Bird Samples (0 positive).....2

CLINICAL HEALTH

The Clinical Health staff aim to protect the health and wellness of Iroquois County residents through a number of clinical based services such as immunizations, health screenings, and the Illinois Breast and Cervical Cancer program.

DEVELOPMENTAL SCREENINGS

Community Health nurses can complete developmental screenings on children two to sixty months of age. These screenings can help identify potential health concerns or delays, allowing the nurses to educate and make appropriate referrals.

Screenings Completed.....47

FIT TESTING

The Iroquois County Public Health Department offers Colorectal Cancer Fecal Immunochemical Test (FIT) kits for individuals 50 to 75 years of age who have not had a colonoscopy in the last 10 years, a sigmoidoscopy in the last 5 years, or a history of colon cancer or prior resection. Colorectal cancer is the third most common cancer diagnosed in both men and women in the United States and is the second leading cancer killer in the U.S., but it is also largely preventable.

FIT Testing.....0

HEMOGLOBIN SCREENINGS

Screenings are offered at any age (children or adult) to detect or monitor low hemoglobin levels.

Screenings Completed.....52

HYPERTENSION SCREENINGS

Blood pressure checks are offered at no cost during normal business hours. Regularly monitoring your blood pressure reduces your chance of heart disease or stroke.

Screenings Completed.....27
Education.....27

CLINICAL HEALTH

ILLINOIS BREAST AND CERVICAL CANCER PROGRAM

ICPHD is a sub-grantee of Livingston County Health Department for the Illinois Breast and Cervical Cancer Program grant. The Illinois Breast and Cervical Cancer Program offers free mammograms, breast exams, pelvic exams and Pap tests to eligible women. Even if a woman has already been diagnosed with cancer, she may receive free treatment if she qualifies. Approval of male client breast services are determined on a case by case basis.

New/Renewal Case Management Clients.....	16
Clinical Breast Exam.....	14
Mammogram.....	16
Pap Test.....	6
Diagnostic Services.....	12
RTTA (referral to treatment act).....	0
Clinical Navigation Insured.....	0

IMMUNIZATION PROGRAM

ADULT IMMUNIZATIONS

Regardless of age, immunizations protect against serious and deadly diseases. Protection from vaccines received as a child can wear off over time, placing adults at risk for new and different diseases. ICPHD starts providing flu shots in September. Getting the flu shot is the best way to reduce the chance of getting the seasonal flu and spreading it to others. ICPHD began providing the COVID-19 vaccine series in December of 2020.

Adult Immunizations.....	66
Flu Shots.....	392
Pneumonia Vaccines.....	13
COVID-19 Vaccines.....	1,828

CHILDHOOD IMMUNIZATIONS

ICPHD offers Illinois' Vaccines for Children (VFC), Children's Health Insurance Program (CHIP) and private pay vaccines for children. The VFC Program helps provide vaccines to children who are uninsured, underinsured, Medicaid eligible, or are American Indian or Alaskan Native. Children's Health Insurance Program (CHIP) provides no-cost or low-cost health coverage for eligible children in Illinois. These programs help ensure all children have a better chance of getting their recommended vaccinations on schedule.

VFC Immunizations.....	632
CHIP Immunizations.....	73
Private Pay Immunizations.....	116

Immunizations for children and adults are available by appointment. ICPHD does accept some private insurances.

CLINICAL HEALTH

INTERNATIONAL TRAVEL CONSULTATION

A pre-travel consultation is recommended to prepare travelers for health concerns and to provide immunizations for vaccine-preventable diseases.

Consultations Completed.....3

JAIL AND INSTITUTION PROGRAM

ICPHD Community Health staff provides physical assessment, consultation (as needed), and referrals (as appropriate) for incarcerated individuals in the Iroquois County jail, thus identifying at-risk prisoners and reducing the spread of infectious disease.

Inmates Assessed.....111

Inmates Referred for Follow-Up.....14

LEAD SCREENINGS

Lead screenings are completed on children over the age of one. Early detection of lead poisoning is important in the prevention of learning disabilities, behavioral problems, brain damage, muscle weakness, or even death.

Screenings Completed.....56

PATERNITY SCREENINGS

Paternity testing is provided for “Court Ordered” cases only.

Screenings Completed.....11

PREGNANCY SCREENINGS

A urine sample pregnancy test is conducted. Early testing allows the mother to start prenatal care and obtain referrals to agencies which provide prenatal and/or parenting education.

Tests Completed.....6

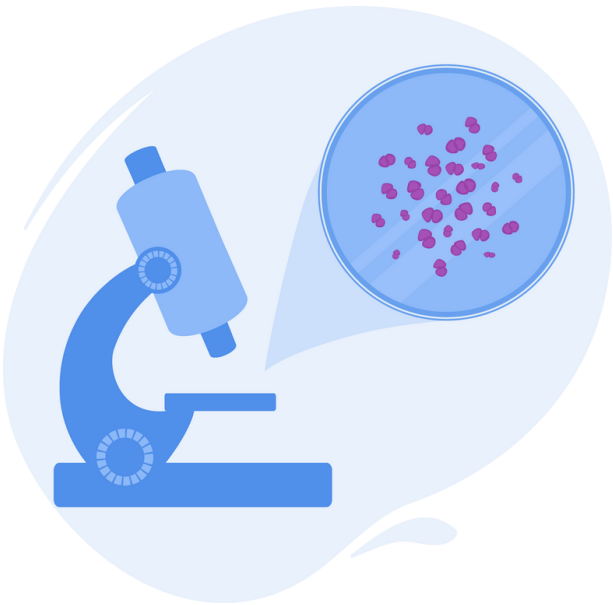

COMMUNITY HEALTH

The Community Health staff works to prevent and mitigate disease outbreaks and promote health through community based services such as communicable disease investigations, community education, and school health programs.

COMMUNICABLE DISEASE INVESTIGATIONS

Health departments are required to investigate communicable (infectious) diseases. Community Health nurses investigate and mitigate communicable diseases reported by mandated reporters, such as health care providers, hospitals, and laboratories. These diseases are mandated to be reported because they are considered to be contagious, infectious, communicable and dangerous to the public’s health. For 2022, ICPHD conducted the following investigations:

Animal Bites.....	52	Hepatitis C.....	31
Chlamydia.....	39	Histoplasmosis.....	7
Campylobacteriosis.....	13	Lyme Disease.....	5
COVID-19.....	3,961	Rabies.....	18
Gonorrhea.....	13	Syphilis.....	2
Haemophilus Influenza Invasive.....	6	Salmonella.....	8
Hepatitis A.....	7	Spotted Fever Rickettsioses.....	0
Hepatitis B.....	3	Strep Disease Group A.....	6

Note: An investigation does not indicate a confirmed case.
For a complete listing of reportable diseases, please refer to the Illinois Department of Public Health website.

COMMUNITY HEALTH

COMMUNITY OUTREACH

Information and education increase public awareness and knowledge, and help to prevent the spread of infectious diseases. ICPHD utilizes several outreach methods and events to disseminate important information to keep Iroquois County residents safe. 2022 Health Education programs include; Narcan Trainings, CPR Trainings, K-12 Health Education, and many others. ICPHD staff have been hard at work strengthening community ties and providing a variety of health education programs, flu clinics, and other public speaking events in communities throughout Iroquois County.

Educational Presentations.....	144
Flu Clinics.....	2
Health Fairs.....	4
Public Speaking Events.....	1
Press Releases.....	39

SCHOOL HEALTH PROGRAM

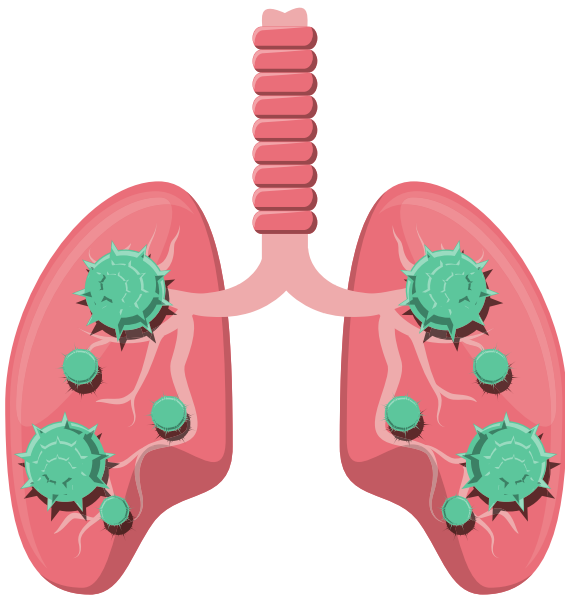

ICPHD Community Health staff currently provides school health nursing services for Milford Area Public Schools #124 and Iroquois County Community Unit School District #9 schools. School nurses are responsible for caring for students who become ill or injured during school hours, taking vital signs, recording symptoms, administering basic medical aid, and maintaining compliance with state school requirements. They also care for students with asthma, diabetes, head lice, allergies, and more. The school nurses provide health education to students regarding STDs, nutrition, bullying prevention, and much more.

Students Served.....	1,752
----------------------	-------

COMMUNITY HEALTH

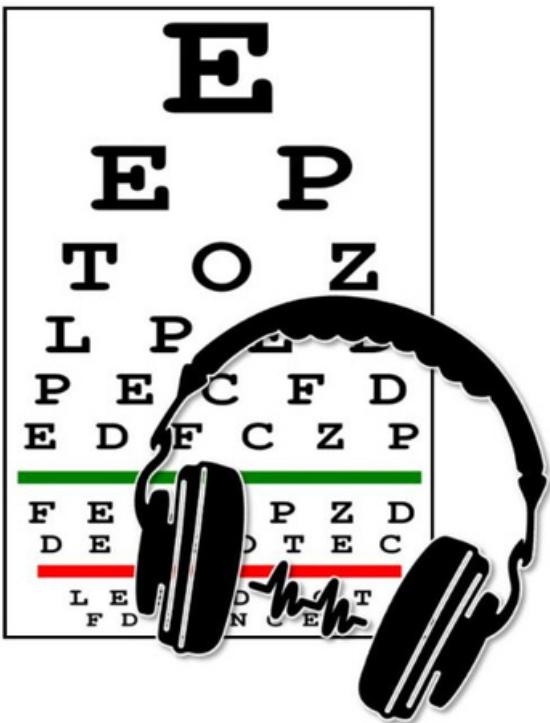

TUBERCULOSIS PROGRAM

Although tuberculosis is an old disease, it remains a current threat throughout the world. The Tuberculosis Program reduces the incidences of this infectious disease in Iroquois County by providing screening, investigation, education, referral, and treatment of active and latent tuberculosis cases for Iroquois County residents. TB skin tests are available at the health department on Mondays, Tuesdays, and Fridays with the exception of holidays.

New Cases Investigated.....	4
Patients on Medication.....	3
Skin Test Given: One-Step.....	42
Skin Test Given: Two-Step.....	21
Tests Not Read.....	8
X-Ray Referrals.....	1

VISION AND HEARING SCREENINGS

ICPHD’s Certified Vision and Hearing Technicians screen preschool through high school students in Iroquois County through the screening process established by the Illinois Department of Public Health. The program provides screenings, appropriate referrals, follow-up, and education.

Vision Screenings.....	1,884
Vision Rescreens.....	283
Vision Referrals.....	163
Hearing Screenings.....	2,275
Hearing Rescreens.....	105
Hearing Referrals.....	17

SENIOR SERVICES

The Senior Services team at the Iroquois County Public Health Department is dedicated to serving citizens, age 60 or older, by providing services that facilitate healthy living.

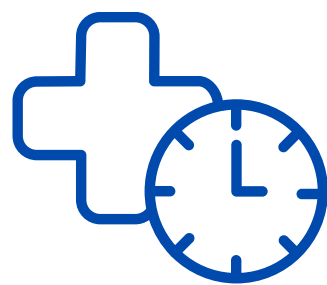

COMMUNITY CARE PROGRAM

The Community Care Program assists senior citizens who might otherwise require nursing home care. This program assists seniors to maintain their independence by providing cost effective alternatives to nursing home placement such as automated medication dispensing and emergency home response along with in-home and community-based services. Eligibility for the program includes people who are: 60 years old or older, a U.S. citizen or legal alien and a resident of Illinois, with non-exempt assets of \$17,500 or less (your home, car, or personal furnishings are classified as exempt assets).

Annual/Needs Based Reassessments.....	21
New Client Assessments.....	71
Nursing Home Pre/Post Screens.....	126
Intensive Casework.....	25
Intensive Monitoring.....	1

RESPITE SERVICES

Respite is short-term services that help families take a break from the daily routine and stress of caring for a loved one through the provision of a caretaker.

PUBLIC HEALTH EMERGENCY PREPAREDNESS

The Iroquois County Public Health Department is charged with providing the citizens of Iroquois County with a plan that will ensure public health response to any overt threat whether natural or man-made. Emergency preparedness includes identifying the crisis at hand, as well as providing education and media information as appropriate to the public.

Public Health Emergency Preparedness is not a steady state; it requires continuous improvement, including frequent testing of plans through drills and exercises and the formulation and execution of corrective action plans. All staff members of ICPHD are NIMS (National Incident Management System) trained.

In the event of a biological emergency, Public Health Emergency Preparedness (PHEP) personnel would be delegated the responsibility of coordinating the response. A plan for the distribution of Strategic National Stockpile (SNS) materials has been developed. The purpose is to establish policies, procedures and guidelines for the dispensing of mass medications and/or vaccinations to the residents of Iroquois County and to anyone who may be traveling through the county in the event of a bioterrorist attack, disease outbreak, or other natural or man-made disaster. In order to respond to an actual event, coordination and support of multiple agencies and community partners are necessary.

IROQUOIS COUNTY PUBLIC HEALTH DEPARTMENT

The mission of the Iroquois County Public Health Department is to **“fulfill society’s interest in assuring conditions in which people can reach their maximum health potential.”**

No matter their station in life, the health department focuses on education and services to help people achieve the highest level of wellness possible for the individual as well as the community.
